If you see any wrong or incomplete information, please feel free to Contact Us, Thank You. Xiaomi Redmi Note 9 Pro Overview: The Redmi Note 9 Pro is powered by the Qualcomm Snapdragon 720G SoC. It is a capable processor and can handle daily tasks very well. The phone is offered in three variants. A 6GB RAM with 64GB storage. Another, 6GB RAM with 128GB storage and 8GB RAM with 128GB storage. Moreover, it offers very good battery life and we could go beyond a day and a half before needing to charge the device again. Moreover, it has support for 33W fast charging which is very helpful and is capable of topping the device up in about an hour. However, fast charging does cause the phone to get hot. Compare With: Redmi Note 10 | Mi Note 10 | Redmi Note 7S | Redmi Note 7 Furthermore, the quad-camera setup on the Redmi Note 9 Pro Max is better than the Redmi Note 9 Pro in terms of resolution. The phone manages good shots during the day but it does sharpen the output. In low-light, it manages to keep noise in check but the night mode does a far better job. Video is stabilized electronically and the Redmi Note 9 Pro Max does a very good job in daylight, low-light stabilization causes a shimmer effect. The 5020mAh battery is quite interesting. Xiaomi claims 29 hours of VoLTE calling and 14 hours of gaming per charge. A 18W charger in the box - faster charging is reserved for the Redmi Note 9 Pro Max. Snapdragon 720G is a modern SoC with two high-performance 2.3GHz cores and six power-efficient 1.8GHz cores, all manufactured on an 8nm process which is said to result in greater power efficiency and lower heat dissipation. Note: We do not guarantee that the specifications are 100% accurate. Most of the specs were collected from the official sites of each brand and some other trusted sources. However, there is always the possibility of making mistakes by both parties during manual data entry or any other reasons.
