Waveguide dual directional coupler

See also QJB precision bi-directional couplers. Applications These couplers are ideal for testing, sampling or monitoring signals simultaneously in both directions of the coupler main arm. Examples include instrumentation for incident and return signal measurement, such as transmitted signal monitoring/radar reflex, etc. The reluctant reflector

Directional reflectors are used in waveguide transmission systems to monitor RF power. These are factory set to different coupling values for forward and reverse waves, per application demand. Coupling values of 10, 20, 30 and 40 dB are available. SWD-0340H-06-BB110-170H-06-BB110 at 170 GHz, 3 dB Coupling, DB DB, DB DB, WR-06 WaveGuide, D-Band, 4 portWD-0340H-10-BB75 at 110 GHz, 3 dB Coupling, 40 DB Directives, Waveguide WR-10, WR-10 Waveguide,
